

Nsys-Boot Frameworks Support

Application frameworks present a challenge to tools like [Nsys-Boot](#) because they are written with certain assumed behaviors about class loading which may not always be valid when running under Nsys-Boot classloader.

This page contains list of frameworks which are working correctly with the Nsys-Boot and other will be added based on input from community.

- [Nsys Platform](#)
- [Spring Framework 3.x](#)
- [Hibernate 4.x](#)
